

# **SIA Utility Token – White Paper**

Version 1.1 – August 2025

## **Table of Contents**

1. Project Overview
2. Vision & Mission
3. Token Description
4. Token Economics (Tokenomics)
5. Governance & Transparency
6. Annual Burn Mechanism
7. Transaction Fees in SOL
8. Strategic SOL Reserve
9. Monthly Royalties (Passive Income)
10. Roadmap
11. Appendices & Links

## 1. Project Overview

Scintia SAS is a French deeptech startup specializing in artificial intelligence, telecommunications, blockchain, and decentralized finance. The SIA project aims to tokenize Scintia's patents, licenses, and source code into a utility token deployed on the Solana blockchain.

## 2. Vision & Mission

**Vision:** Build a decentralized digital infrastructure that leverages Scintia's AI innovations through an open, secure, and scalable ecosystem.

**Mission:** The SIA token serves as the access key, exchange medium, and value driver within this ecosystem, with a transparent and attractive economic model.

## 3. Token Description

- Name: SIA
- Blockchain: Solana (SPL Token)
- Type: Utility Token
- Total supply: 500,000,000 tokens
- Initial price (pre-sale): \$0.01
- Decimals: 6
- Smart contract audits: ongoing

## 4. Token Economics (Tokenomics)

### Allocation:

- Public Pre-sale: 20% (100,000,000 tokens)
- Scintia SAS: 45% (225,000,000 tokens)
- Founders (5 x 4%): 20% (100,000,000 tokens)
- Strategic Partnerships: 7% (35,000,000 tokens)
- Marketing & Community: 6% (30,000,000 tokens)
- Airdrop & Early Adopters: 2% (10,000,000 tokens)

## 5. Governance & Transparency

- Multisig wallet for strategic reserves
- Public and audited smart contracts
- Progressive transition to a DAO (2026)
- Monthly publication of key metrics (revenue, distributions, burn, treasury)

## 6. Annual Burn Mechanism

Each year, 10% of unsold tokens are permanently burned. This includes:

- Unsold tokens from the pre-sale
- Unused tokens held by Scintia

This burn is transparent and verifiable on the Solana blockchain.

## 7. Transaction Fees in SOL

- A 2% fee in SOL is applied on every buy and sell transaction
- No fees on simple wallet-to-wallet transfers

These fees go to an external operations wallet to fund technical and operational costs.

## 8. Strategic SOL Reserve

- 10% of all token sales (pre-sale + Scintia) are converted to SOL
- Funds stored in a multisig wallet
- Uses: liquidity support, buybacks, grants, partnerships, long-term development

## 9. Monthly Royalties (Passive Income)

All SIA token holders receive a royalty payment every 30 days equal to 0.33% of Scintia SAS's gross revenue.

- Paid in USD or SOL
- Based on a monthly snapshot
- Proportional to the amount of tokens held

This system provides holders with passive income directly tied to the company's performance.

## 10. Roadmap

### September–December 2025:

- Public pre-sale of SIA tokens (100M at \$0.01)
- Establishment of SOL reserve
- Referral program launch
- Initial marketing campaigns

### Q1 2026:

- DEX listing (Raydium / Jupiter)
- Start of monthly royalty distributions
- Launch of first AI tokenized services
- Global communication push

### Q2 2026:

- Light DAO implementation
- Technical integrations
- Strategic partnerships

### Q3–Q4 2026:

- B2B/B2G sales ramp-up
- Financial structuring for listing
- Token utility use cases expansion

### 2027:

- Listing on Euronext Access
- Global rollout of AI/Web3 platform
